

GEOM data structure example

Example of geom

```
1 {
2   "type": "Feature",
3   "geometry": {
4     "type": "Polygon",
5     "coordinates": [
6       [
7         [144.96719369224047, -37.80957240851556],
8         ...,
9         [144.96719369224047, -37.80957240851556]
10      ]
11    ]
12  },
13  "properties": {}
14 }
```

The `geometry` attribute will be used with PostgreSQL PostGIS and get stored for `geom` attribute in the database for all table.
